SUMMARY

I am a dedicated Django Developer with hands-on experience in building robust and scalable web applications using Django and Django Rest Framework (DRF). With a strong background in Python, I have successfully completed multiple projects that demonstrate my ability to handle both backend development and API integration.

I am proficient in designing and implementing RESTful APIs, working with relational databases (like PostgreSQL and MySQL), and ensuring security and performance optimization in Django applications. My experience also includes version control with Git, deploying applications on cloud platforms, and collaborating with cross-functional teams to deliver high-quality products.

I have a passion for learning and staying updated with the latest technologies and best practices in the Django ecosystem. My goal is to contribute to a dynamic team where I can apply my skills to solve complex problems and build innovative solutions.

PASSIONS

I love to transform innovative ideas into reality through the power of programming.

STRENGTHS

Expertise in Django and DRF

Proven ability to build and maintain scalable web applications using Django and Django Rest Framework.

STRENGTHS

Strong Python Programming Skills

Deep understanding of Python with the capability to write efficient and maintainable code.

API Development and Integration

Skilled in creating RESTful APIs and integrating third-party services, with experience using tools like Postman for API testing.
