EXPERIENCE - SUPERVISOR - PARLE DC

Considered cost effectiveness, technical feasibility and acceptance to assess or propose sustainability initiatives.

Tracked company inventory and noted item shortages for future product orders.

Analyzed corporate intelligence data to identify trends and patterns.

KEY COMPETENCIES

Problem-Solving Skills: Ability to analyze complex problems, identify issues in code, and devise effective solutions. This includes debugging, optimizing performance

Collaboration and Communication: Strong teamwork and communication skills, essential for working effectively in Agile development environments. This includes collaborating with cross-functional teams

Adaptability and Continuous Learning: Flexibility to adapt to new technologies, frameworks, and tools in the fast-evolving tech landscape. Demonstrated commitment to continuous learning, staying updated with the latest industry trends, and applying new knowledge to enhance project outcomes.

SUMMARY

Passionate Django Developer with a strong foundation in Python and a deep understanding of the Django framework, dedicated to building robust and scalable web applications. Experienced in developing dynamic websites, RESTful APIs, and integrating modern front-end technologies. Proficient in database management, cloud deployment, and version control systems, with a focus on delivering high-quality, secure, and efficient code. Adept at collaborating in Agile environments, problem-solving, and continuously learning new technologies to stay at the forefront of web development. Committed to creating user-friendly, innovative solutions that meet both business and user needs.

PROJECTS

VAULTME -

Overview:

Vault Me is an innovative software solution designed to offer users a highly secure and versatile platform for storing and managing a wide array of data types, including contacts, PDFs, images, personal details, and much more. Built with cutting-edge technologies such as Django and Python, Vault Me ensures that your data is stored safely while providing an intuitive and seamless user experience.

In addition to its robust data storage capabilities, Vault Me goes beyond traditional storage solutions by incorporating features reminiscent of popular communication platforms like Discord. Users can effortlessly connect and engage with others through blogs and discussions, making Vault Me not just a storage tool but a dynamic community hub.

Moreover, Vault Me includes a fully integrated E-commerce website, providing users with the opportunity to explore and shop for products within the same secure environment.

EDUCATION & CERTIFICATIONS

Bachelor of Business Administration
GLA UNIVERSITY MATHURA

Django for Everybody Specialization (Coursera)

Django 3 - Full Stack Websites with Python Web Development (Udemy)

Google IT Automation with Python Professional Certificate (Coursera)

Github learning lab:github actions
The Complete Web Developer Bootcamp (Udemy)
Full stack web development - BACKEND -Django, python.   DATABASE- Sqlite3 , Postresql. FRONTEND - html , css , javascript

SKILLS

Django Framework: Deep understanding of Django, including MVC architecture, ORM, Django REST Framework (DRF), and admin panel customization.

Django Templating: Experience with Django's templating engine for rendering dynamic content on web pages.

Middleware & Signals: Knowledge of Django middleware and signals for handling requests, responses, and other custom behaviors.

Core Python: Strong grasp of Python basics, data structures, OOP, and modules.

RESTful APIs: Experience in creating and consuming RESTful APIs, using Django REST Framework (DRF).

Relational Databases: Experience with PostgreSQL, MySQL, or SQLite, including writing complex SQL queries and understanding of database
